Summary — Full Stack Software Engineer (SDE II) with 4 years of experience building large-scale, high-performance enterprise applications using Java, Spring Boot, React, Next.js, TypeScript, SQL, and Kafka. Experienced in designing scalable backend services, developing RESTful APIs, modernising legacy systems, and delivering end-to-end products with a focus on performance, reliability, and maintainability.

Education

Motilal Nehru National Institute of Technology, Prayagraj
Bachelor of Technology in Information Technology

Jun 2018-May 2022

Skills

Languages Java, JavaScript, TypeScript, SQL, HTML, CSS, SCSS, C++

Certification
– The Complete Web Development Bootcamp — Angela Yu
– Spring Boot & Hibernate For Beginners — Chad Darby

Frameworks Spring Boot, ReactJS, Spring Batch, NextJS

Technical Tools Postman, Jira, Kafka, JUnit, Git, Jenkins

Experience

Magicbricks

Jun 2022 – Present

Software Developer 2 (SDE 2)

Oct 2024 – Present

AI Telecaller

- Engineered a multi-tenant SaaS platform integrating client CRMs with an in-house AI telephony engine via REST APIs, enabling real-time call initiation and structured data retrieval within minutes.
- Reduced client acquisition costs by **65%** and eliminated manual processing through end-to-end automation, with an intuitive dashboard for streamlined lead management.

Bank Recommendation Engine (BRE)

- Spearheaded the development of an automated home loan recommendation tool utilising client income, property specifics, and loan details, resulting in a **30%** increase in qualified lead generation.
- Built a self-contained recommendation widget with integrated filtering functionality, enabling users to explore and customise BRE recommendations independently.
- Increased the traffic of home loan pages by **100%** with a longer dwell time for each user.

Software Developer 1 (SDE 1)

Jun 2022 – Sep 2024

DSA Payout & Dashboard

- Developed a complete pipeline from DSA and their lead onboarding to complete payout for a type of lead source in the Homeloan vertical.
- Decreased the Turnaround Time of the whole pipeline, which used to take more than **7 days to 2 days**.
- Increased the business revenue from **150 Cr to 650 Cr monthly**.

Gmail Parser

- Engineered an automated solution for parsing bank emails and capturing essential data directly into the database, achieving a complete elimination of manual processing requirements.
- Improved operational efficiency by reducing turnaround time by **1-2 days** while simultaneously cutting manual processing costs.

Mbcrm Revamp

- Led a complete architectural overhaul, replacing outdated External Tomcat/Ant infrastructure with modern Spring Boot and React technologies while delivering improved UI/UX and minimising interdependencies across different verticals.
- Enhanced the UI and functionalities while boosting response time by **5x** for all major and minor processes.

Achievements

- Spearheaded the development of the DSA module, resulting in the highest performance rating and **Gold Star Award** recognised by senior leadership for exceptional technical expertise and project ownership.
- Engineered magicAI, an **AI telecaller** management platform that drove significant operational improvements and received the Gold Star Award for excellence.
- Consistently received the highest rating, **"Exceeds Expectations"** in every quarter of my work experience.
